

Horticultural Services

Central Coast Wilds is dedicated to providing clients with a wide selection of high quality native plants and ecological landscape services. We are committed to our customer's satisfaction and to the ecological integrity of their landscapes.

California Native Plants

Central Coast Wilds grows native plants for landscape, green building, revegetation and habitat restoration applications. Our nursery is located in the City of Santa Cruz. We have expertise in the propagation of plant species for coastal bluff, grassland, riparian, wetland and woodland habitats.

Custom Contract Growing

Central Coast Wilds specializes in custom growing native plants for landscape projects on a contract basis. Contract grown plants are the most affordable manner in which to supply the perfect plants for your project.

Ecological Landscape Services

Central Coast Wilds provides complete landscape design, installation and maintenance services for commercial and residential clients.
